

Large Umbrellas

Protection and Flexibility

Shades of Comfort offer a comprehensive range of square, rectangular and round parasols supplied in varying sizes up to 9m in length and width.

Shades will survey and advise on the best solution, size and colour umbrella to suit your outdoor area. Our team of experienced engineers will be able to offer a full installation and maintenance service if required.

Different installation options include:

- > Mobile Base
- > Permanent in-ground fixing sleeve
- > Optional valances
- > Side Sheets
- > Guttering

For additional shelter and protection, we recommend the provision of glass screening which when combined with integral heating and lighting solutions, our parasols provide an attractive environment for outdoor hospitality giving shade, shelter, light, heat resulting in – Comfort.

Umbrellas can be fitted in various ways and have many accessories to accompany them.

Case Study

The Cornish Arms

Situated in the Cornish countryside, this establishment has an instant warm welcoming and friendly feel with a classic atmosphere.

Due to its location it can be subject to the effects of winds throughout the year. This is where we helped provide The Cornish Arms with a solution that made the outside area extremely popular.

Using two of our 4m x 4m umbrellas with guttering, heating and lighting we provided The Cornish Arms with the perfect shade and heating solution.

With the addition of our stylish glass screening this outdoor area has been transformed into an alfresco dining area with the added benefit of also being a designated smoking area.
