

The Unique Pavilion

All year round extension to your business

The pavilion has been developed by Shades of Comfort and it's concept is a completely new addition to our product range.

The easy and fast assembly time ensures the Pavilion can be in place and ready for use, compared to other solutions, in a much shorter space of time.

Benefits include a strong aluminum structure, a rigid pyramid roof and self extinguishing fabric. These elements combined offer the opportunity of an all year round extension to your business that can provide added attraction for alfresco dining, corporate events and private parties.

As it is built in the required amount of modules, there is no limit to the size of the Pavilion which allowing you to extend with ease in the future.

Case Study

Drayton Manor Theme Park

Drayton Manor's Thomas Land in Staffordshire were the first UK establishment to commission Shades of Comfort to install our new Pavilion product.

They chose a fully glazed 8M x5M aluminium structure with sliding double doors complimented with heating and lighting inside.

This is a product that can be used all year round providing them with a great return on investment. Situated in the heart of Thomas land, Drayton Manor chose to use this extension to one of their dining areas. However, this adaptable product can be used in a variety of situations.
