

Outdoor Screens

Controlling your trading area

Shades of Comfort believe screening is an excellent way to mark out your trading area, control your customer base and stand out from your surrounding businesses.

Available in wood, fabric and toughened glass, these screens assist and are often installed to define smoking and non-smoking areas whilst adding to the aura and style of the exterior of any outdoor trading area.

In addition to standard screening solutions we also design bespoke screens providing unique and visually appealing solutions for each individual objective. With a range of styles, sizes and colours we are sure to provide you with a product that suits your needs. In addition – all of our fabric and glass screens are branded graphically with your corporate identity adding to the strength of your marketing.

Free-Standing

Case Study

All Bar One, Chiswick

A popular area in West London, it was vital for the visual individuality for the trading area of this public house to be defined.

Our unique wooden and stainless steel barrier system not only looks stylish but is practical and can be removed and replaced on a daily basis which is necessary in many situations.

The screening here consists of 6 stainless steel barrier systems at 1100mm centres. This consists of weighted stainless steel basea with hardwood posts for quality and durability, stainless steel cross members providing a solid structure to support the fabric screens.

The screening is finished with attractive black acrylic screens providing All Bar One with the perfect outside area that is easy to dis-and-re assemble, eye-catching, made from high quality products and compliments their already stylish image.
